☐ Non-Routine Fracturing

☐ Water Shut off

☐ Conversion to Injection

13. Describe Proposed or Completed Operations

It is intended to deepen the existing PC open hole by pulling the 1" tubing and drilling to new total depth of approximately 2050'. A 2-7/8" longstring (casing) will be ran to surface and cemented with approximately 100 sxs of Class B cement. The PC formation will be selectively perforated and stimulated. The well will be returned to production as a slimhole without tubing.

14. I hereby certify that the foregoing is true and correct.
