Gentlemen:

Our attention has been directed to your #2 Hartman well in section 31-29N-11W.

The wellhead connections are not in compliance with Rule 115 of the New Mexico Oil Conservation Commission "Rules and Regulations." The rule, in part, is as follows: "Valves shall be installed and maintained in good working order to permit pressures to be obtained on both casing and tubing."

This office intends to enforce this rule. Therefore, I recommend that you make immediate corrective measures.

Yours very truly,

A. R. Kendrick
Engineer Dist. #3
