

AZTEC OIL & GAS COMPANY

P. O. DRAWER 570
FARMINGTON, NEW MEXICO

April 24, 1962

New Mexico Oil Conservation Commission
1000 Rio Brazos Road
Aztec, New Mexico

Dear Sir:

This is to inform you that Aztec Oil and Gas Company plans to commingle their Hagood 29-G well, located in Section 30-29N-13W, San Juan County, New Mexico, with their Hagood "F" Battery in Section 20-29N-13W.

There will be a separator and tank installed on the Hagood 29-G location, where the oil will be produced and stored while the gas will be produced to the flow line.

Sincerely yours,

AZTEC OIL AND GAS COMPANY

Joe C. Salmon
District Superintendent

JCS:gdb

According to a telephone conversation with Mr. Bill Perdue of Aztec O & G, the situation is as follows:

All oil produced from the Hagood "G" #29 well is separated, tanked, and run from the location. Such location is in the Cha Cha-Gallup Pool. All separator gas is conducted through the flowline to the Hagood "G" #28 where it is commingled with oil and gas from that well. The commingled product is then flowed to the Hagood "G" Battery "F" in the Totah-Gallup Oil Pool. No gas is to be vented or flared.
