San Juan

New Mexico

(Field)

(County or Subdivision)

(State or Territory)

The elevation of the derrick floor above sea level is 5005' a.l.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Rotary drilling equipment will be used to drill to approximately 500' to the casing head. Casing Program 300' of 8-1/2" OD pipe casing cemented to surface. Production String: Required amount of 4-1/2" OD pipe casing cemented with required amount of cement. Same method of cementing will be used. Mud Program Maximum and for samples will be used. Electric logs etc. will be run before setting casing or abandonment. Stimulation treatments such as acidizing or fracturing may be employed in completion.

NOTE: True location falls in large natural drainage ravine. Road location 50' North.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
