(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Farmington, New Mexico May 10, 19 56

Well No. 74 is located 1450 ft. from S line and 1850 ft. from W line of sec. 29
SW/4 of Section 29 T-29-N R-12-W NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
West Kutz-Pictured Cliffs San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5358 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On April 26, 1956, this well was spudded and 8-5/8" casing was landed at 107 feet and cemented with 75 sacks cement. After waiting on cement for 24 hours, casing and water shut off were tested with 500 pounds for 30 minutes with no drop in pressure. Drilling operations were resumed.

On April 28, 1956, 5-1/2" casing was landed at 1306 feet and cemented with 75 sacks. After waiting on cement for 48 hours, water shut off was tested with a two hour bailing test. Test was successful. Completion operations resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
