New Mexico Oil Conservation Commission  
1000 Rio Brazos Road  
Aztec, New Mexico  
Attn: District Supervisor

Dear Sir:

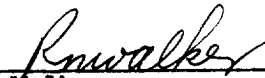

Attached are the original and two copies of Northwest New Mexico  
Packer Leakage Test forms for our USA Glenn H. Callow No. 9, located  
1600' FSL, 1000' FEL, Section 28, T29N, R13W.

Because we feel the information submitted indicates no communication between  
the two zones and to run the flow test No. 2 required in the Packer Leak-  
age Test would necessitate wasting a substantial amount of gas, we request  
that an allowable be granted for the Gallup completion and an exception  
be granted to allow us to conduct the required test on the Dakota zone  
after a pipeline connection has been secured. We expect a market for the  
Dakota gas in approximately three months.

We would greatly appreciate your early consideration of this request.

Very truly yours,

TENNESSEE GAS TRANSMISSION COMPANY

R. N. Walker
