Re: El Pamco Co., Inc.
Lechner #1
F-30-29N-10W

Dear Horace:

As you are aware the above referenced well is flowing a large amount of gas and water to a pond on the Lechner farm. This is apparently coming from either the bradenhead or intermediate casing. In order to determine the source of this gas and water you are hereby directed to dig out the bradenhead and intermediate casing spools and conduct a bradenhead test within 10 days.

Contact this office when you are ready to conduct test, as it will be witnessed.

Very truly yours,

Charles Gholson

Charles Gholson
Deputy Inspector
