Re: Northwest Cha Cha Unit #41-28, A-28-29N-14W
Northwest Cha Cha Unit #32-20, G-20-29N-14W

Gentlemen:

Recent NMOCD bradenhead testing on the referenced wells revealed incorrect information on the well signs. The sign at the Northwest Cha Cha Unit #41-28 showed the range to be 17W. The correct location is 14W. The footages on the sign at the Northwest Cha Cha Unit #32-20 should read 2290 feet from the north line and 1825 feet from the east line.

You are hereby directed to make the necessary corrections or repairs within 30 days. Copies of the 1986 bradenhead tests on all wells in the Northwest Cha Cha Unit are enclosed for your reference.

Yours truly,

Carolyn J. Taplin
Field Representative
