Re: Gas Volume Calculations, Special
Gas-Oil Ratio Tests, Cha Cha
Gallup and Totah-Gallup Oil Pools

Gentlemen:

Subject calculations should be made using gas gravities measured at either the separator or at the pipeline interchange. Gravities measured at the interchange are: Cha Cha system, 0.757; and Totah #1, 0.760.

All gas charts for subject tests shall be submitted with Form C-116. The charts will be returned to each operator.

Yours very truly

A. R. Kendrick
Engineer, District #3
