McKay, Payne & Zachry  
200 Loma Linda  
Albuquerque, New Mexico

Gentlemen:

Oil Conservation Commission Rules and Regulations require that Initial Deliverability tests be filed on wells within 45 days after connection to pipeline facilities.

We find that your company has not complied with this on the following well:

McKay-Payne-Zachry #1 Jackson-Sanchez, L-19-29N-10W

Failure to test this well will result in necessity of shutting it off production unless substantial reason can be shown why the test was not run. Will you please give this matter your early consideration.

Yours very truly

Emery C. Arnold  
Supervisor, District #3

ECA:ks

1. The first step in the process of creating a new product is to identify a market need. This can be done through market research, which involves gathering information about the target market and its needs.

2. The second step is to develop a concept for the product. This involves creating a detailed description of the product, including its features, benefits, and target market.

3. The third step is to create a prototype of the product. This involves building a physical model of the product that can be used to test the concept and gather feedback from potential customers.

4. The fourth step is to conduct a market test. This involves selling the product to a small group of potential customers and gathering feedback on their experience.

5. The fifth step is to launch the product. This involves creating a marketing plan and launching the product to the target market.

6. The sixth step is to monitor the product's performance. This involves tracking sales, customer feedback, and other metrics to determine if the product is meeting its goals.

7. The seventh step is to make improvements. This involves using customer feedback and other data to make changes to the product or marketing plan.

8. The eighth step is to continue to monitor the product's performance. This involves ongoing tracking of sales, customer feedback, and other metrics to ensure the product remains successful.
