12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Operator proposes to deepen well by drilling out of the 4 1/2", 9.5 #/ft. casing, set at 1620' KB with a 3 7/8" drill bit. The new hole will be drilled with the use of a blowout preventer with appropriate kill lines and chokes. Water based drilling mud will be used to drill the well to 1750' GR. The fruitland Coal and Picture Cliffs sands will be evaluated using electric logs. If either formation appears to have natural gas potential, 2 7/8" non-upset 6.40 #/ft. tubing will be set at TD and cemented to surface with 65sk(82cf) 50/50 Pozmix, containing 2% Gel. The sand or coal formation will be perforated and hydraulically fractured to make a natural gas completion.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
