DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total depth = 2175' - 2175'. Cemented from 2096 to 2112 with 2 shots per foot. Gravel with 10,000 sand and 10,000 gals. water. Gravel from 2000 to 2000, creating reservoir - 2000 max., 1000' in., final - 2000'. I. P. 10' in.

Launched 66 lbs. (2112') of 1" tubing at 2112. Shot in for cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
