New York, N.Y.

Attn: Mr. A. E. Weiss

Dear Sir:

We just received a letter from Mr. Bradley Keyes of GeoElectric Incorporated regarding the demand for plugging on your #1 Bunce Federal well.

Mr. Keyes states that your partner is out of the country and will not return until about July 20 and that it will be difficult for you to make a decision prior to that time whether to work the well over or to plug and abandon it and drill a new well.

We are, therefore, granting an extension of time to July 25, 1963 for the filing of Form C-102 in this office and until August 1, 1963 to actually have a rig on the well.

I would like to emphasize that no further extension of time of any kind will be granted beyond that date as we feel there is a possibility that waste may be occurring in the well bore; therefore in the absence of some action by your company prior to August 1, 1963 we will set the matter for hearing at the first August hearing of the Oil Conservation Commission in order that the matter may be resolved.

Yours very truly

ECA:ks

COMMISSION OF CONSERVATION

1000 RING ROAD

ATLANTA, GEORGIA

April 1, 1964

Mr. J. Edgar Hoover
Federal Bureau of Investigation
Washington, D. C.

Dear Mr. Hoover:

Enclosed

is a copy of a letterhead memorandum from the Georgia Department of Transportation, dated March 27, 1964, regarding the proposed construction of a new highway through the Okefenokee Swamp.

The Georgia Department of Transportation is planning to construct a new highway through the Okefenokee Swamp, which is a large area of wetlands in the southeastern United States. The proposed highway is intended to improve transportation in the area and to provide access to the swamp for recreational purposes.

The Georgia Department of Transportation is requesting your assistance in obtaining the necessary permits for the construction of the highway. The proposed highway is located in the Okefenokee Swamp, which is a large area of wetlands in the southeastern United States.

I am sure that you will be able to provide the necessary assistance in obtaining the necessary permits for the construction of the highway. The proposed highway is located in the Okefenokee Swamp, which is a large area of wetlands in the southeastern United States. The Georgia Department of Transportation is planning to construct a new highway through the Okefenokee Swamp, which is a large area of wetlands in the southeastern United States.

Sincerely,
[Signature]

Aztec, N. M.

Emery:

I just received a telephone call from Mr. Weiss in regard to the Bunce Federal # 1. Due to the fact that his partner is out of the country and will not return until the 20th. or 21st. of July, he has ask me to see if it is possible to obtain a 30 day extension and within that time he will file the necessary papers to either work over the well or to Plug and Abandon it, and drill a new one.

I realize that you have been more than lenient in allowing as much time as you have on this well, but would greatly appreciate it if at all possible, you would grant this extension.

Sincerely,

B. H. Keyes
