Gentlemen:

ATTN: Mr. Emory Arnold

Re: My file #1317-D Texas National
NE $\frac{1}{4}$ Sec. 22-29-12, San Juan

Texas National Petroleum Company is the owner of a Federal lease covering the Northeast Quarter (NE $\frac{1}{4}$) of Section 22, Township 29 North, Range 12 West, in San Juan County, N. M. This lease expires on December 1, 1960 unless a well is commenced prior to that date.

As you know, the Dakota producing interval in this area has been spaced in 320-acre drilling and spacing units. It has been impossible in the short time that was available to form a unit with the above described 160 acres by agreement, and in behalf of said Texas National Petroleum Company I have filed an application with the New Mexico Oil Conservation Commission for pooling the North Half (N $\frac{1}{2}$) of said Section 22, Twp. 29N, R.12W. This application has been set for hearing on November 16th. If Texas National is not successful in obtaining a pooling order at this hearing, it will then request a non-standard unit for the NE $\frac{1}{4}$ of said Section 22.

In the interim, it is imperative that it commence a well on this acreage without delay. Therefore, pending an order of the Commission pooling the N $\frac{1}{2}$ of Section 22, or for a non-standard unit in the NE $\frac{1}{4}$ of said section, I will appreciate your approving and authorizing the applicant to commence the drilling of a well in the NE $\frac{1}{4}$ of said Section 22 at a location 1450 feet from the North line of said section, and 1190 feet from the East line of said section.

Yours very truly,

Geo. L. Verity

Dear Sirs:

Re: Mr. Emory Arnold

Re: Oil and Gas Lease No. 1-1111-1 Texas National
Oil and Gas Lease No. 1-1111-1 Texas National

Texas National Petroleum Company is the owner of a
General Lease covering the Northeast Quarter (NE 1/4) of Section
33, Township 22 North, Range 12 West, in San Juan County, N.M.
This lease expires on December 1, 1960 unless a well is com-
menced prior to that date.

As you know, the Dakota producing interval in this area
has been spaced in 240-acre drilling and spacing units. It has
been impossible in the short time that was available to form
units with the above described 160 acres by agreement, and in
deficit of said Texas National Petroleum Company I have filed
an application with the New Mexico Oil Conservation Commission
for pooling the North Half (N 1/2) of said Section 33, Twp. 22N,
R. 12W. This application has been set for hearing on November
10th. If Texas National is not successful in obtaining a pool-
ing order at this hearing, it will then request a non-standard
unit for the N 1/2 of said Section 33.

In the interim, it is imperative that it commence a well
on this acreage without delay. Therefore, pending an order of
the Commission pooling the N 1/2 of Section 33, or for a non-
standard unit in the N 1/2 of said section, I will operate and
drilling and completing the applicant to commence the drilling
of a well in the N 1/2 of said Section 33 at a location west
from the North line of said section, and east from
the East line of said section.

Very truly,

Geo. L. Verity
