13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We are negotiating with the owner of the well in the NW/4 of this section to join us in a Fruitland Coal Gas Unit in the North half of this section.

We will either try to recomplete the Maxey in the Fruitland Coal or try to recomplete one of the Pictured Cliffs wells now operating in the North half of Sec. 24 as a dual PC-Fruitland Coal well.

If we recomplete one of the other PC wells now operating in this half section, we will plug the Maxey # 1.

Since we are on the edge of the Fruitland Coal development and since it will cost approximately \$60,000 to do this, this decision requires a lot of negotiations and research.

We will try to do this as soon as possible.

Another problem is that both PC well now operating in the North half of this section are on unorthodox locations because the federal leases contain acreage in the South half of this section.

14. I hereby certify that the foregoing is true and correct
