Dear Lynn:

The first above well was plugged in 1960 by the bonding company of Berger, Briggs, and Company. (See Attached C-103) This well is now leaking and needs to be replugged.

The second well was plugged in 1953 by the owners. (See attached C-103) It now has pressure on the casing and will flow gas and water.

If appropriate, please docket cases for these wells or start the procedure to let bids for a contract to plug these wells.

Yours truly,

Frank T. Chavez
Deputy Inspector, District #3
