Undesignated Gallup San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. **(To be reported later.)**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Spudded 11" hole on September 5, 1960 and drilled to 218'. Set 8-5/8" casing at 217' with 125 sacks cement containing 2% calcium chloride. Did not circulate. Reconnected between hole with pipe down 2" tubing with 75 sacks cement. Received circulation. After waiting on cement tested 8-5/8" casing with 400 psi for 30 minutes, which held with no indication of pressure drop. Reduced hole to 7-7/8" at 218' and resumed drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
