

March 6, 1959

Mr. Daniel S. Nutter
Chief Engineer
Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Mr. Nutter:

We have received a copy of your letter of March 5, 1959, to Mr. George B. Walker of Whyburn and Company in which you refer to the seepage of gas and water at the plugged hole site of thw Wood Number I in S14, T 28 N, R 11 W. It is apparent that the plugging job done by the drilling contractor was inadequate. Therefore, we advise you that we have made arrangements with Graystone Drilling Company of Farmington to drill out the existing plug and to re-plug the hole. This will be done on or about the 15th of March.

Very truly yours,

Sierra Del Oro
