Re: Gale #1 M-13-29N-11W

Dear Woody:

As you are aware, the above referenced well has not produced since 1974 and is known to have a casing leak. You were directed to repair the leak or plug the well on October 9, 1979 and have failed to do so. In order to comply with Rule 202-B, you are hereby directed to initiate immediate remedial action or plug the well in accordance with a Division approved plugging program. Failure to comply with this directive will result in the matter being turned over to our Legal Department for further action.

Yours truly,

Charles Gholson
Deputy Oil & Gas Inspector
