NOTICE OF INTENTION TO ABANDON WELL.....		

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

January 20, 1964

Well No. 147 is located 660 ft. from N line and 1980 ft. from E line of sec. 13

22/4 Sec. 13      T29N      R19W      NMSP  
(1/4 Sec. and Sec. No.)      (Twp.)      (Range)      (Meridian)

Hattlesnake      San Juan County      New Mexico  
(Field)      (County or Subdivision)      (State or Territory)

The elevation of the derrick floor above sea level is 5293 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Drilled to TD 6853'. Released rotary rig 5-13-63. Moved in completion unit. Swabbed well dry. No show of oil or gas from the Penn. San Baker magnesium bridge plug, set at 6577' RB. Ran 2 7/8" tubing with Baker Model "B" packer, landed at 6398' RB. Perforated 7" casing opposite the Penn. "B" with 2 jets per foot: 6421'-25"; 6453'-57"; 6460'-76"; 6481'-86"; 6533'-39". Acidized with 1000 gallons 15% mud cut acid - displaced with 38 bbls. water. Swabbed dry. Shut well in pending possible plugback to the Bakota. Injected 20,000 gallons of 7 1/2% acid - displaced with 28,500 gallons water 5-28-63. Swabbed back load water. Well had small blow of gas - non-commercial - SI until 7-1-63. Moved in completion unit. Swabbed 25 bbls. water per day with seams of oil and small blow of gas. Preparing to plug and abandon.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations are to be commenced.

Title District Manager

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

Furthermore, it is noted that the records should be kept in a secure and accessible format. Regular backups are recommended to prevent data loss in the event of a system failure or disaster.

The second part of the document outlines the procedures for handling discrepancies. It states that any variance between the recorded amounts and the actual physical counts should be investigated immediately. The responsible personnel should be identified, and the cause of the error should be determined.

Once the cause is identified, corrective actions should be taken to prevent similar errors from occurring in the future. This may involve additional training for staff or improvements to the existing processes.

In conclusion, the document stresses that accurate record-keeping is essential for the success of any organization. It provides a clear framework for how to manage financial and operational data effectively.

The following table provides a summary of the key points discussed in the document:

Topic	Key Points
Record Keeping	Use receipts/invoices; maintain secure records; regular backups.
Discrepancy Handling	Investigate immediately; identify responsible personnel; determine cause; take corrective actions.
