Francis L. Harvey  
Well No. 1 Jones is located 900 ft. from (N) line and 1100 ft. from (E) line of sec. 13

SW NE NE Sec. 13 29 N 11W N. M. P. M.  
(4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Wildcat San Juan County New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5730 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

Well was drilled to 2039 with rotary tools and electric log run showing top Pictured Cliffs sand at 2035. 5 1/2 " casing was cemented to 2039 with 100 sacks regular cement. Cable tools were moved on and plug drilled, hole was bailed dry and allowed to stand for 2 hours with no leaks. Well was carried to total depth of 2085' without showing enough gas to guage. Well was shot with 65 quarts from 2053' to 2085'. Guage 6 hours after shot showed 737M'. 72 hour shut in pressure read 640 #. Tubing was run and well closed in for pipeline connection on October 23, 1951.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
