**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

It is intended to move a cable tool rig on this well in order to determine if the well is making water and the depth at which water is entering the well.

It is also intended to re-shoot the Pictured Cliffs with S.N.G.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
