13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The pump on the referenced location is fueled by propane. The propane tank has once again been emptied by a third party. Furthermore, this well is a shallow producer with a high volume of water. Harken has elected not to refill the propane tank and shut the well in for the winter months to avoid damage to production equipment/facilities during inclement weather. The well will be returned to production in the Spring of 1997 when the threat of freezing weather has passed.
