126

NEW MEXICO

Fulcher Basin

San Juan

New Mexico.

The elevation of the derrick floor above sea level is 5773 ft

DETAILS OF WORK

State the time of day, weather, and other conditions, show size, weights, and lengths of proposed casing, indicate mudlogging, etc., mention the points, and all other important proposed work.

allowing for the reaction of the twentieth :-

due to the small amount of gas encountered in the picture cliff,
the casing was run through the picture cliff, instead of
cementing the first 100 feet.

RECEIVED

It is recommended that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
