13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

It is proposed to renew the T&A approval on this well for another year. It is anticipated that there is Mesaverde potential uphole in this wellbore. This potential will be evaluated as part of a regional reservoir management plan study. This wellbore should not be plugged until it has been determined that it has no further recompletion potential.

(The attached copy of the letter Conoco received concerning the wellbore located at the above location referred to well No. 2, but the location is definitely for the Fogelson No. 1.)
