DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Present TD of well is 6660'. This well is an open hole completion from 6527' to 6660'.

We propose to deepen the well approximately 70' to a TD of 6730'. to test the Lower Paradox formation. A 4 1/2" O.D. liner will be set and cemented from 6527' to TD, the liner perforated, and the well completed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
