ORIGINAL ARTICLES

THE EFFECT OF VITAMIN DEFICIENCY ON THE GROWTH OF THE RAT

W. H. HALL,
M. D., D. V. M.

From the Department of Pathology, University of California, Davis, California.

Received for publication May 15, 1934.

The effect of vitamin deficiency on the growth of the rat has been studied by a number of investigators. The results have been conflicting, but generally have shown that the growth of the rat is retarded when it is fed a diet deficient in vitamins. The purpose of this study was to determine the effect of vitamin deficiency on the growth of the rat, and to determine the effect of the different vitamins on the growth of the rat.
