Attention: Mr. Charles Gholson
Deputy Oil & Gas Inspector

Dear Charles:

In compliance with your letter of January 15, 1985 Benson-Montin-Greer Drilling Corp. is making arrangements to move a rig on Dustin #1 (K-06-29N-12W) within the next few weeks.

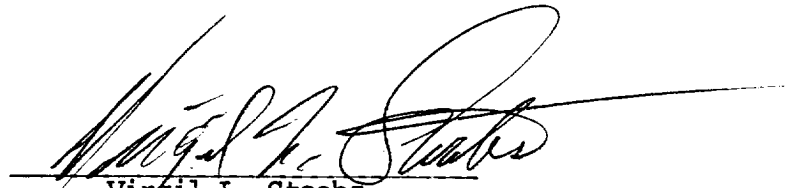

As to the Price #1 (N-15-31N-13W) gas well, you will recall that the La Plata Community Store and United States Post Office are utilizing heating gas from this well. Also, a residence is using heating gas from the well. The store has recently been sold and I have visited with the new owners about plugging the well and they have expressed the desire to work out an arrangement whereby they can continue to have gas from the well to heat the store and post office. Accordingly, we request your advice as to how B-M-G, as operator, can satisfy the Oil Conservation Division orders and in the process allow the store, post office and residence to continue to have heating gas.

Thank you for your consideration and advice in this matter.

Sincerely yours,

BENSON-MONTIN-GREER DRILLING CORP.
