RECEIVED

AUG 18 1959

IL CON. COM.
DIST. 3

The elevation of the derrick floor above sea level is 5383 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We now plan to squeeze the Gallup perforation 4807-26, 4832-38, 4846-58, 4864-800. The zone will be squeezed under a Baker retrieval cementer and the tubing pulled. The X-mas tree will be left in tact and the master valve closed. The well will be temporarily abandoned.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Sunray Mid-Continent Oil Company
