In re: Julander Lease,
Unit Letter J
Sec. 31, 29-N, 11-W,
San Juan County, New Mexico

Dear Sir:

On September 28 we filed Form C-104 and Open Flow Test Data on the above captioned well. In checking our records, we find that we have not yet received an allowable. Date first distillate was run to tank was September 16, 1960. We would appreciate if you would look into this matter and advise.

We would also liked to be placed on the mailing list in order that we may receive the gas proration schedules each month covering the area in which our well is located.

Correspondence may be directed to Veta Weatherby at the letter head address. Thank you.

Yours very truly,

W. A. Moncrief, Jr.
