Totah Valley **San Juan** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. **(To be reported later.)**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Spudded 8-3/4" hole on May 22, 1961, to 178' and reamed 12-1/4" hole to 205'. Set 8-5/8" casing at 205' with 190 sacks cement containing 2 percent Sulfur Chloride. Circulated 4 sacks of cement. After waiting on cement, tested 8-1/2" casing with 300 psi for 30 minutes, which held with no indication of pressure drop. Reduced hole to 7-7/8" at 205' and resumed drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
