If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Note: Received verbal approval from Steve Mason on 5/5/86 to perform the following:

Vent approximately 12 MCFPD from the subject well for one week. This period will be used to test the well and obtain a gas sample in order to properly size a dehydrator. The well is presently shut in by the Gas Company of New Mexico because the gas has too high of a moisture content. The vented gas will be measured and all royalties paid accordingly.
