17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

On February 24, 1969, the Gallup perforations 5181-86' and 5227-33' were squeezed off with 50 sacks of Class "C" cement. Cement was established over the Undesignated Pictured Cliffs formation by perforating a one foot interval at 1170' with 4 SPF and squeezing with 410 sacks Class "A" cement and circulating to surface. The Undesignated Pictured Cliffs interval 1112-1117' was perforated with 4 SPF and acidized with 500 gallons 15% acid. Well did not flow gas so it was sand-water fraced with 5,000 gallons water and 5,000 pounds 20-40 sand. The well was swabbed for three days with no gas shows and it was shut in on February 27, 1969. Due to uneconomical production, we are temporarily abandoning this well.
