Re: Eastern Petroleum Corp., Navajo #4, J-2-29N-19W  
Undesignated Gallup, San Juan County

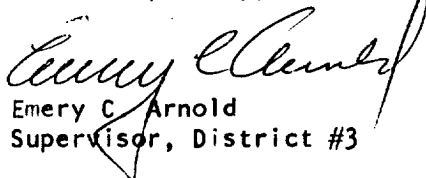

Gentlemen:

Information contained on Form C-104 filed February 2, 1968, indicates that the above well is completed at a depth of 431 feet in the Gallup formation. The pool name on the form shows "Rattlesnake Dakota" and this was not corrected upon approval of the C-104.

We note that you report production on the well under "Rattlesnake Dakota" which I believe is in error. It should be reported with the Navajo #23, in G-2-29N-19W, which is also a Gallup completion. You will note that these two wells are listed together in the Oil Proration Schedule under Undesignated Gallup, San Juan County.

Will you please clarify the above situation and if the information above is correct, please report the production from the well correctly as indicated?

Yours very truly,

  
Emery C. Arnold  
Supervisor, District #3
