ADDRESS REPLY TO  
POST OFFICE BOX 990  
FARMINGTON, NEW MEXICO 87401

Mr. William S. Huey  
Director, Department of Game and Fish  
State Capitol  
Santa Fe, New Mexico 87503

Dear Mr. Huey:

Your letter of December 5 to Mr. Bill Parrish has been given to me for reply.

The well that you refer to is our Stanolind Gas Com #1A. This well is presently being drilled, the reserve pit has been lined with plastic, and the produced waters or fluids used in drilling the well will be hauled away from the river, and the reserve pit covered after drilling and completion operations cease. We anticipate no contamination of river water during our operations.

After the well is completed, we will install a fiberglass tank to contain produced waters and also a steel tank to contain liquid hydrocarbons. This installation will have a firewall-dike type of protection to keep any spillage that might occur from gaining access to the river.

If you have any questions concerning this operation, please contact me at our above address.

Yours truly,

Carl E. Matthews  
Division Production Manager
