13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Casing repair has been completed. The operator is testing a gas lift operation to determine if economic production can be restored. A replacement well is in the permit process. Should production restoration fail, this well will be plugged. Given the difficult surface approvals in this area, operator asks for as long of a test period as possible.
