17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We originally filed to complete this well in the Mesaverde zone only.
We now propose to complete it as a Mesaverde - Pictured Cliffs dual.
The papers will be filed with the New Mexico Oil Conservation Division
and all offset operators will be notified. The Mesaverde will be
perforated from 3836 feet to 4606 feet and fractured. The Pictured
Cliffs zone will be perforated from 2168 feet to 2216 feet and fractured.
Tubing will be run in both zones and a packer will be installed between
zones.
