13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be files within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On 10/16/2000 Amoco Production Company submitted a notice indicating that it was our intention to plug and abandon the subject well. At such time, we were in the process of obtaining partner approval and preparing a plugging procedure to submit for approval to plug and abandon the well bore. At the present time we respectfully request permission to delay the plugging of this well pending a more thorough review of the downhole conditions to determine if the well is in need of repair, stimulation, if it can be placed on compression, or any well servicing activity that may result in returning the well to production in the Basin Dakota Pool. It is also our understanding that the Industry subcommitte study team reviewing the possible downsizing the Fruitland spacing are nearing a proposal for decision concerning this matter. In this event we request permission to maintain the wellbore pending their decision to pursue or cancel as the well has uphole potential in the Fruitland, however, spacing limitations prevent a recompletion at the present time.
