	☐ Conversion to Injection

13. Describe Proposed or Completed Operations (Clearly state all pertinent dates, including estimated date of starting any proposed well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to th

Plans are to bury a #2 and a #8 guage cathodic cable 12 to 18 inches in the ground from a proposed cathodic line located in the SE1/4 NE1/4, Sec. 5, T.30 N., R.7 W to the NEBU 45A well location, as shown on the attached map. The purpose of this undertaking is to provide cathodic protection for the NEBU 45A well casing. The cable will be routed parallel to an existing Williams Field Service pipeline and will be 10 -15 feet from the pipeline. No right-of-way clearing will be required and the cable will be plowed in with the use of a ripper tooth on a ditch witch. All surface disturbance will be confined to the existing 50 foot right-of-way. An archeological report 80-SJC-245, dated August 6, 1980, was prepared for the pipeline right-of-way (Grant No. NM-42294), and is on file with the Bureau of Land Management. The project will be on Bureau of Reclamation lands and will be ~~100~~ feet in length.
