17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work).\*

This well was originally approved as a single Dakota well. We desire to dually complete the well as a Dakota-Chacra dual completion after finding the Chacra zone during logging. We desire to complete as follows: Perforate the Dakota zone and fracture to stimulate production. Set a bridge plug above the Dakota zone. Perforate and fracture the Chacra zone to stimulate production. Clean the Chacra zone up. Pull the bridge plug. Clean the Dakota zone up. Run tubing with a production packer and set above the Dakota zone with a sliding sleeve above the packer. Set packer. Nipple down the wellhead. Test packer for leakage. Test Dakota zone. Test Chacra zone and connect to a gathering system.

Gas from both formations have previously been dedicated to a transporter.
