Should waivers from all offset operators not accompany an application for administrative approval, the New Mexico Oil Conservation Commission will hold the application for a period of twenty (20) days from date of receipt by the Commission's Santa Fe office. If, after said twenty day period, no protest nor request for hearing is received by the Santa Fe office, the application will then be processed.

NTE: If the proposed multiple completion will result in an unorthodox well location and/or a non-standard perforation unit in one or more of

Marvin Kruschke, being first dually sworn according to law upon his oath deposes and says:

That he is of lawful age and has full knowledge of the facts herein below set out.

That he is employed by Baker Packers in the capacity of Office Manager and as such as its authorized agent.

That on July 2, 1981, he personally supervised the setting of a 4½" Baker Model R-3 Double-Grip Packer in SUPRON ENERGY CORPORATION's (Make and Type of Packer) (Operator)

Reid "B" Well No. 2-E, located in Unit Letter E, Section 31, Township 29 North, Range 10 West, N.M.P.M., San Juan County, New Mexico.

That said packer was set at a subsurface depth of 6174 feet, said depth measurement having been furnished by John Walters

That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as to prevent any movement of fluids across the packer.
