(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We desire to lay a pipeline from this well to a gathering line 866 ft. in length in a direction of N 51° 31' W. The natural gas purchasers in the area have refused to connect this well. The proposed right-of-way (see attached plat) is all on the same lease as the well is drilled on. This will be a 2", 0.154" wall Grade "B" pipe to be installed on the surface of the earth and no right-of-way clearing or grading will be required. The line will be hydrostatically tested to 1000 PSIG for 15 minutes after it has been welded in place. This line is to be used for a period of one (1) year until a permanent gathering system can be installed. The line will then be removed.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.
