RE: Fruitland #2
F-03-29N-15W
San Juan County, NM

Dear Mr. Ryder:

Greenwood Holdings Fruitland #2 well has not produced any economic hydrocarbons in over 12 months. Due to casing leaks this well is not considered to be usable for economic purposes. The New Mexico Oil Conservation Division directs Greenwood Holdings to plug the Fruitland #2 well according to Rules #201 and #202 of the Commission (enclosure). Plugging procedures will be initiated within thirty days. Failure to comply will result in fines and forced plugging of the Fruitland #2 well.

The Commission needs reports on any workovers which have taken place on the Fruitland #2 well especially including data on cement tops and squeezes. A C-103 form with a proposed plugging program will be submitted for approval after the workover reports are filed.

Yours truly,

A handwritten signature in cursive script that reads "Denny G. Foust".

Denny G. Foust
