Re: Delinquent Packer Leakage Tests 1985

Gentlemen:

This office did not receive 1985 packer leakage tests on the below listed well/wells. Annual tests on all non/down-hole commingled multiple completions are required in north western New Mexico.

You are hereby directed to schedule and test these wells within 60 days of this date. These tests will serve as 1985 tests, and 1986 tests are to be ran at a later date.

If you have any questions, please contact this office.
