13. Describe Proposed or Completed Operations

Manana proposes to temporarily abandon this well according to the following procedure. Manana is evaluating this well as a Fruitland Coal completion and it would be premature to P&A it at this time.

Comply with all NMOCD and BLM safety regulations. Blow down well and kill with water as necessary. ND wellhead and NU full opening valve. RU wireline unit and pump truck. Run a 2-7/8" gauge ring to 1550' or as deep as possible. Set a 2-7/8" wireline CIBP at 1550'. Load casing with water. Notify NMOCD to witness pressure test of casing to 500# for 30 minutes. NU wellhead. RD wireline unit and pump truck.
