We request an extension to 11-1-95 to fill in production pits as required by State Rule 202.B.3. Wellbore P&A work was completed on 3-24-94 & all equipment has been removed. This well is in the Vulnerable Area and may require some soil remediation prior to filling in the pits. All pits are currently dry and are fenced.

We plan to begin pit assessment and closure, as approved in our pit closure plan, in the near future and will advise the NMOCD upon commencing this work.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
