Exception to No-Flare  
USG Section 18 No. 43  
IND-89-IND-58  
Unit F, Section 18, T29N, R16W  
San Juan County, New Mexico

Dear Mr. Townsend:

We are requesting either a permanent exception to the No-Flare Rule or an exception based on payout for the subject well. Our reasons are as follows:

1. Gas is not of marketable quality (Approximately 300 BTU)
2. Nearest pipeline is six miles from wellsite
3. Gas will not support combustion for lease use
4. Projected production is 400 bopd.

Volume to be vented daily is approximately 2900 mcf. Total well cost of \$650,000 is estimated to payout in two months based on production of 400 bopd at \$26/bbl.

Thank you for your earliest attention to this request.

Sincerely,

*R. J. Broussard* *BS*
