Farmington, NM 87401

RE: Disposal #1, F-03-29N-11W

To Whom It May Concern:

The New Mexico Oil Conservation Division, as part of its Underground Injection Control authority, requires Basin Disposal to perform an MIT on the above disposal well once every five years. An MIT is due on this well on or before April 15, 1993.

The mechanical integrity of the casing-tubing annulus is tested by submitting the annulus to a pressure of 300 psi for 30 minutes with less than ten percent bleed-off as outlined in Commission Rule 704.

We require a 24 to 48 hour notice so that we may be present to witness testing. Basin Disposal will furnish personnel and equipment to complete the tests.

If you have any questions please feel free to contact this office.

Sincerely,

Dianna K. Fairhurst
