Re: Aggie State 32 #1 well, located H-32-29N-09W, San Juan County

Dear Mr. Geren:

On the 14th of March I spoke with William Manchester of your office and informed him that your company is in serious violation of our rules and regulations by producing the referenced well without a state approved plugging bond. At that time, he assured me that it would taken care of immediately. The well has been producing since about December of 1990. Today I spoke with Diane Richardson of our Santa Fe office, and she has not heard a word about your securing a bond. You are hereby ordered to shut the referenced well in immediately and may not produce it until a State of New Mexico approved plugging bond is secured. The transporters of both the condensate and gas will ensure that no product is purchased until further notice.

If you have any questions please contact this office at 334-6178.

Yours truly,

Ernie Busch  
District Geologist/Deputy Oil & Gas Inspector
