13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Duane Spencer gave verbal approval to extend the testing period an additional 60 days past the normal 30 days allowed by NTL-4A,III.C. during a telephone conversation on January 23, 1991.

His verbal approval was conditioned upon BHP documenting it in writing and that the amount of vented gas would not exceed the 50MMCF allowed by NTL-4A,III.C.

The additional testing time is necessary to determine the true production potential of the well.

Your cooperation and assistance in this matter is appreciated.
